Brief

With over twenty years of delivering high-quality services, my own expertise includes being open to learning and improving. I as well posses the ability to teach others. I envision myself setting the stage for success. As my services are in demand among a multitude of fields, here are a few brief summaries.

Media and Advanced Specialties

My previous roles involved a methodology which embraced a "hurry up and wait" mentality. This tactic contributed to multiple Emmy nominations and numerous successful projects.

During this period, I played a key role in coordinating live broadcasts, managing redundancies, ensuring seamless tracking live-to-tape. I as well successfully managed this among multiple studios, consistently ensuring that all equipment operated efficiently.

I have also had the privilege of overseeing music production projects for several prestigious recording labels and national talent. I am exceptionally proficient in production in addition to post as well. A comprehensive software list available via my website.

Public Administration, Nonprofit and Healthcare Management

Education has endowed me with a robust comprehension of policy analysis, strategic planning, and financial management. The nonprofit sector is an area I am deeply committed to due to its unparalleled ability to drive sustainable social change.

I will always believe in patient care, optimizing clinical operations, and enhancing the overall patient experience. Previously I significantly reduced prior authorizations and improved access to necessary resources for doctors and nurses.

Summary

These achievements highlight my ability to adapt to extenuating circumstances and implement meaningful changes. The prospect of contributing my skills compliments my merit, plus my experience has lead me to having a versatile skill set which may align with additional requirements. Thank you.
